PROFESSIONAL SUMMARY

ICT diploma student (Machakos University, graduating 2027) with hands-on programming experience in HTML, CSS, JavaScript, PHP, and C++. Built a full sports management system from scratch, covering both front-end and back-end logic. Combines technical problem-solving with strong communication, teamwork, and leadership skills developed through coaching and competitive sport. Seeking an internship, attachment, or trainee role to apply and grow programming and IT skills in a professional environment, with openness to freelance web/software projects.

TECHNICAL SKILLS

- Programming & Web Development: HTML, CSS, JavaScript, PHP, C++
- Built and tested a full-stack Sports Management System (PHP, HTML, CSS, JavaScript)
- Computer packages: Microsoft Word, Excel, PowerPoint
- Version control & development tools: VS Code
- Problem-solving, debugging, and logical thinking

PROJECTS

Sports Management System — *Personal Project*

- Designed and built a web-based system to manage teams, schedules, and player records
- Used PHP for back-end logic, with HTML, CSS, and JavaScript for the interface
- Combined technical knowledge with personal sports background to design practical features

Personal Portfolio — *In Progress*

- Built using VS Code to showcase projects and technical skills
- Available on request; in the process of publishing to GitHub
